

### **GDPR Article 13 (Information to be Provided Where Personal Data are Collected from the Data Subject)**

#### **Description**

When the personal data related to a data subject is collected from that data subject, the controller at that time provides the data subject with all mentioned below information:

- The identity and the contact details of the controller
- Data protection officer contact details
- The main motive of processing(for which the personal data are intended) and the legal basis for the processing
- The recipients or categories of recipients of the personal data
- The controller intends to transfer personal data to a third country or international organization and the existence or absence of an adequacy decision by the Commission (If Applicable)

Apart from the all above-mentioned details of the data subject, the controller shall provide the data subject with the further information to make sure fair and transparent processing:

- Either time period or criteria to find the period for which the personal data will be stored.
- The existence of the right to request the controller to access, rectify, or erase personal data. In addition, one can restrict the processing of data subject or right to port the data.
- Right to withdraw the consent at any time but without affecting the lawfulness of processing based on consent before withdrawal.
- Right to lodge a complaint with a supervisory authority.
- The existence of automated decision-making contains meaningful information. It includes the logic involved and significance along with the consequences of such processing for the data subject.

When controller intends to process the personal data for some other purpose, it shall provide the data subject prior to that further processing. It provides relevant data subject information on that other purpose as discussed above. However, if the data subject already has information, then the above-mentioned content shall not be applied.

### **CloudCodes Allow to Manage Personal Data Collected from Data Subject**

**CloudCodes** values the importance of personal data from the data subject. They allow users to manage that data in their own way without any risk. With the help of solutions offered by the **CloudCodes**, a user can control the access to its personal information over the cloud. DLP solutions are one of the best-suited approach by **CloudCodes** that one can use to restrict, allow, and track all type of actions on the personal data of the data subject.
